Serial No. 10/594,124  
January 28, 2009

**AMENDMENTS TO THE SPECIFICATION:**

**Page 6, prior to the first paragraph, insert the following paragraph:**

As those skilled in the art will appreciate, the system described hereinbelow is implemented by computer devices linked to each other by a suitable communications network. Such well known computer devices *per se* include a CPU, linked data/program storage devices and I/O ports. In particular, computer program code is stored in computer-readable storage media (e.g., magnetic or solid state IC memory devices) and accessed by the CPU for execution in order to cause the described functions to occur as the program code is executed.
